# CH Belt Conveyor

CH Belt Conveyors have been used with great success for many years in municipal swage pants and a wide variety of industrial application. They are notable for their stability, smooth running, low maintenance requirements.

CH Belt Conveyor is a decide designed for transporting sludge and screenings. The equipment employs PVC belt or rubber belt to displace mass particles in a closed or partially covered stand, in a straight direction, from hopper to discharge point.

| Capacity, ton/hr |                      |      |     |     |
|------------------|----------------------|------|-----|-----|
| Belt Width, mm   | Conveying Speed, m/s |      |     |     |
|                  | 0.2                  | 0.4  | 0.8 | 1.6 |
| 450              | 18.75                | 37.5 | 75  | 150 |
| 600              | 25                   | 50   | 100 | 200 |
| 750              | 31.25                | 62.5 | 125 | 250 |
| 900              | 37.5                 | 75   | 150 | 300 |

| Motor Power, kW   |                    |     |      |      |
|-------------------|--------------------|-----|------|------|
| Capacity, tons/hr | Conveyor Length, m |     |      |      |
|                   | 10                 | 20  | 30   | 40   |
| 25                | 0.2                | 0.4 | 0.75 | 1.1  |
| 50                | 0.75               | 1.5 | 2.2  | 3    |
| 100               | 1.5                | 3   | 3.7  | 5.5  |
| 150               | 2.2                | 3.7 | 5.5  | 7.5  |
| 200               | 3                  | 5.5 | 7.5  | 11   |
| 250               | 3.7                | 7.5 | 11   | 15   |
| 300               | 5.5                | 7.5 | 11   | 18.5 |

## CUSTOMIZATION

- STAINLESS STEEL COVER
- WASH SYSTEM
- VARIETY OF BELT MATERIALS
- COUNTER WEIGHT
- CUSTOMIZE SPEED
- MATERIAL OF CONSTRUCTION

## FEATURES

- RIGID PRODUCT
- QUICK DELIVERY
- HIGH QUALITY
- LOW CAPITAL COST
- SIMPLE OPERATION
- LOW MAINTENANCE INTENSITY
- GOOD AFTER SALES SERVICE

Our Technology Ensure You A Better Water Quality
