

MECHANICAL SCUM SCRAPER

The efficient scum removal system

Our Technology Ensure You A Better Water Quality

CH MECHANICAL SCUM SCRAPER

APPLICATION

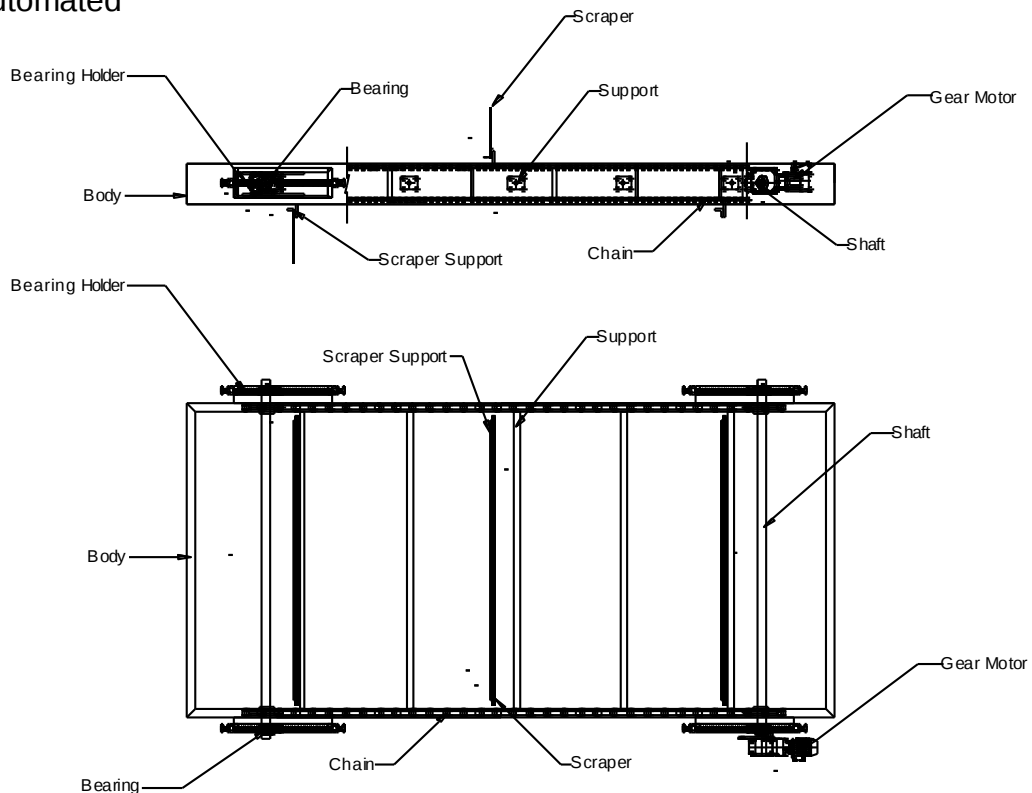

CH Mechanical Scum Scraper is designed for the efficient removal of surface sludge without excessive water. It is suitable for use in most applications involving surface sludge, including both municipal wastewater treatment plants and industrial processes.

FEATURES

- Mild steel, 304 stainless steel and 316 stainless steel construction
- Custom fabricated in our factory with state of the art equipment and fabrication techniques
- Designed to exacting specifications
- Component standardization, upgrades and installation assistance

KEY BENEFITS

- Technical expertise and experience
- Low maintenance
- Low operational cost
- Fully automated

MANUFACTURING BY:

TS CHUAN ENGINEERING & DRILLING SDN. BHD. (496540-K)
